★★★★★ SKIL is a great brand

Reviewed in the United States on June 7, 2019

Style: Reciprocating Saw Kit | [Vine Customer Review of Free Product \(What's this?\)](#)

My husband does home renovations and hardwood floors. He now has several tools by the SKIL brand. He used to be strictly a Dewalt man. He says SKIL tools are very well made and work well. This Reciprocating Saw is another fine addition to his array of tools.

My husband really likes that this Reciprocating Saw is cordless. This cordless saw kit includes a PWR Core 12 2.0Ah Lithium Battery and PWR Jump Charger. This Reciprocating Saw is easy to charge. The PWR Core 12 Lithium battery technology wraps each cell with cooling material to keep the battery powering on for 25% longer run time and 2X battery life. This feature is important for my husband who may not always have access to a way to charge a tool on the job. It's also cool that you can plug into the battery's USB port, so you have PWR Assist mobile charging. That way if his phone is about to die, he can charge it so he won't miss a customer's call.

This tool works well. The adjustable pivoting shoe provides constant contact with the work piece for smoother cuts and minimizes vibration. The tool-less blade change makes the process quick and seamless. My husband recommends the SKIL brand.

★★★★★ Excellent design and function. GREAT Battery and charger functions!

Reviewed in the United States on June 8, 2019

Style: Reciprocating Saw Kit | [Vine Customer Review of Free Product \(What's this?\)](#)

The saw itself is well made and highly functional. Easy blade changes without tools and operation is comfortable in hand and without excessive vibration. The power is sufficient for most uses. This saw is easily comparable to much more expensive units.

What REALLY sets this unit apart is the battery and charger. The 12V battery supplies enough power for somewhat extended use and has a charge level indicator on the battery. What is unique is that this battery can also serve as a power brick with a USB port to charge phones or other USB powered devices. Haven't seen that before on a tool battery!

Next the charger has a unique PWRJump function that can be used on a depleted battery to charge to 25% in just five minutes. Run out of power on the battery? Attach it to the charger, hit the PWRJump button and grab a cup of coffee. Come back and you're back in business! Excellent!

This is an easy Five Star rating for me due to the exceptional features and performance. I can honestly and very heartily recommend the Saw! A++

★★★★★ Good portable saw for home and yard use with some nice features and few drawbacks

Reviewed in the United States on August 1, 2019

Style: Reciprocating Saw Kit | [Vine Customer Review of Free Product \(What's this?\)](#)

So, we have a fairly well appointed workshop but did not have a cordless reciprocating saw. We live in the woods, so there's a lot of use for saws here - from dead limbs to overgrown shrubbery, as well as small wood-working projects that my husband likes to do. We've had good experiences with SKIL tools, although a month in we don't know if this will prove as durable as those. On the plus side, this is very good for tight spaces and really convenient for areas where a cord is prohibitive - so much easier to limb on a ladder with this than stretching an extension cord from a portable generator or trying to use our heavier gas-powered chainsaw or a manual saw, especially as we are getting older. At a bit over 3 pounds, it's not a featherweight but it is still very portable and has the power we need. (Can't compare in power to our wired saw or to a chainsaw, so for us it's "in addition to" not "instead of.") It charges up fast and has a nice battery indicator. The LED light is a real plus, although the USB charger is not a feature that appeals in our own usage.

Even though it's for home use, I wish it had a case. Definite drawback in SKIL that they don't offer even a bag for this. I also really wish chargers were cross-compatible. Even in my home workshop it can be a bit of a pain in the neck keeping them straight (especially without a case), and it would make me think hard before selecting these tools for a go kit for remote jobs. When space and weight are factors, you want to streamline as much as you can.

Still, for our home workshop, we're quite happy with this line and with this particular tool. It's a time-saver for us.

★★★★★ Safer reciprocating saw

Reviewed in the United States on June 13, 2019

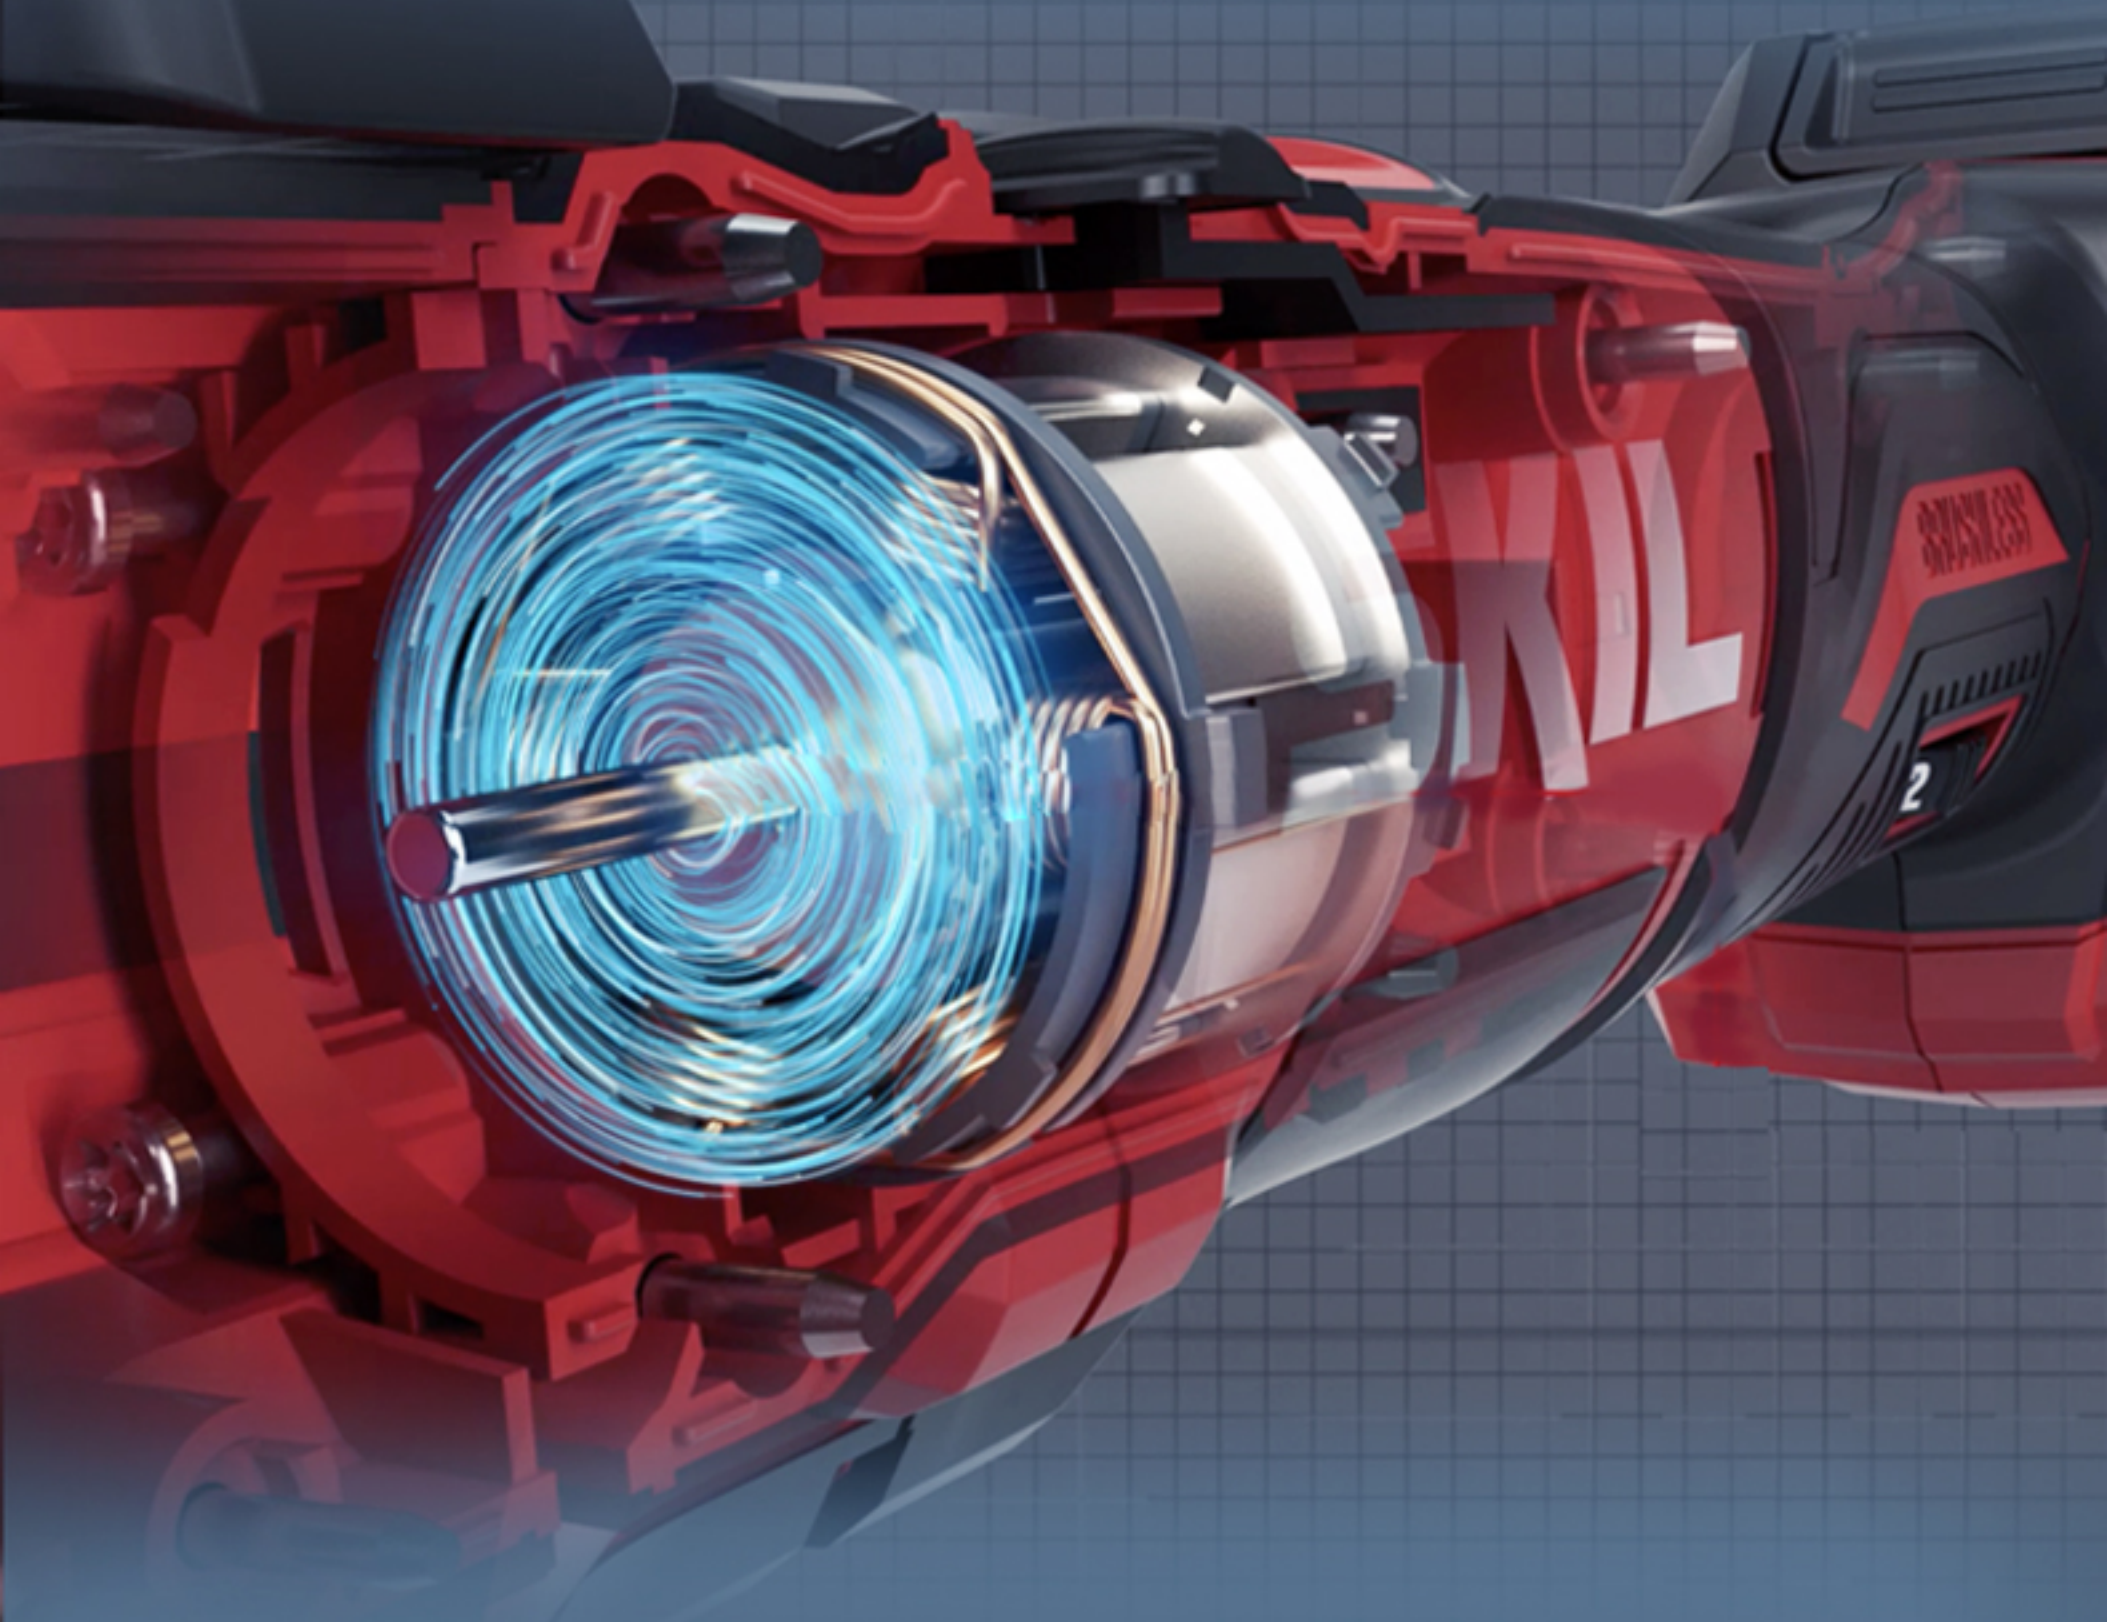

Style: Reciprocating Saw Kit | [Vine Customer Review of Free Product \(What's this?\)](#)

I have a Sawzall reciprocating saw and it's a great tool. I was still happy to own this cordless saw because of the convenience and safety it offers over my existing saw. Around our house, we use a reciprocating saw for trimming branches more than anything else. This means being up on a ladder and using the Sawzall it also means wrangling an extension cord. With this SKIL saw we can forget about the cord and forget about worrying that we might cut into the cord or get it tangled on us or the ladder. It's also a lot more convenient for a small job to just grab this saw and get started without having to unwind an extension cord and get it positioned for the job.

I don't think it's reasonable to expect this saw to have the peak power or the power life of a corded Sawzall, even though the costs are similar. This saw wins on convenience, safety and portability. I do like the battery quick charge design and the status indicators. It would be nice if it came with a plastic case or a bag, but at least the box it comes in is not a bad storage option. And it comes with decent instructions. I'm happy to have it because it fits a lot of projects around our house.
